CERTIFICATE OF COMPLETION

The Complete 2023 Web Development Bootcamp
Instructors Dr. Angela Yu

Dagimfre Seid

Date July 20, 2023
Length 66 total hours

ABOUT

I first heard about programming when my uncle told me about how the internet and the web work with coding. However, the real time I discovered it as a passion and joy was in highschool during an IT class, where we built a personal webpage using html and css. Since then, my fascination for programming has grown, and I decided to teach myself. Now, having completed the no. 1 top-rated Udemy course and with several real-world projects under my belt, I'm excited for a full-time career in Front-end Development.

PROJECTS

Nova-Cars-An-Ecommerce-Website

— https://dagmfre-seid.vercel.app
— https://github.com/dagmfre/Nova-Cars-An-Ecommerce-Website

Nova-Cars is a MERN stack website designed and built for effortless car exploration and purchase. It allows users to navigate the platform easily to find and reserve a wide variety of cars, including SUVs, trucks, and vans. The site also offers a straightforward exploring and booking system that allows users to choose their desired car based on varying prices, fuel & transmission types, speed, and models.

Additionally, all user information, including booked car type, price, pick-up/drop-off date, and location, will be stored in an Atlas MongoDB database.

Complete-Netflix-Clone

— https://github.com/dagmfre/Netflix

The project is a full Netflix clone with additional features such as OAuth, JWT, and session-based authentication, including 'Sign In with Google and Facebook.' I utilized React, Node with Express, MongoDB, Passport.js, and integrated the TMDB API.

EDUCATION

Udemy: **The Complete 2021 Web Development Bootcamp**

· (March 2021 - August 2022)
